**8. Answer to the following questions briefly.**

1. Name three elements of the natural environment.

Ans: The name of three elements of natural environment are: soil, water and trees.

2. Where do we have more floods in Bangladesh?

Ans: We know that the southern region of Bangladesh is lower than the other part of Bangladesh. There are lots of rivers and canals. For the vast water body we have more floods in there and the coastal area.

3. Name three elements of the social environment.

Ans: The name of three elements of social environment are: houses, schools and playgrounds.

4. Why do we need to plant more trees?

Ans: We need to plant more trees because trees give us oxygen, food and wood.

### **9. Descriptive Questions**

1. How does the land differ between north and south of Bangladesh?

Ans: In Bangladesh, there are differences between the natural environments of the north and the south. Like the land of northern region is higher where the land of southern region is lower. In the north there are few rivers and canals but in the south there are lots of river and canals and marshy lands.

2. What effect does a wet climate have on our social environment?

Ans: Our social life and environment both are dependent on our natural environment. Though our country is small in size but we have variety in our weather, climate and culture. Our social life is mostly dependent on nature. As we have wet weather, we have plenty of trees in the forests, fishes. So, we can say that our social environment is closely connected with our wet weather.

S/N: Environment of Bangladesh (will be made by the students)
